

REPORT OF THE PROJECT:

Title of the Project: परिवेशदूषणम् तत्प्रतिकारश्च
(**Parivesadushanam
Tatpratikarasca**)

Theme of the Project:

Dept. of Sanskrit, DCH College entitled a project to the students of 4th semester Sanskrit Hons., 2021-22. The name of the project was "Parivesadushanam Tatpratikarasca".

To aware the students about our nature this was a humble trial. What is nature or environment overall students can understand. But how to protect our environment- this is the theme of this project. Pollution is a burning issue in everyday life. Sound pollution, Air pollution, Water pollution are the different types of pollution. The teachers gave the writing-up to the students but instead of copying they have putted much more information and in this way the enriched us. In Sanskrit Literature there are various descriptions of our environment. When a student seriously goes through it they can understand we must save our environment from pollution. So the theme was awareness about Environment pollution.

Outcome of the Project:

The project was very successful. At about forty (40) students of 5th Semester Sanskrit Hons. have enrolled in this project. After the project work the students are very much aware about our mother nature. They come forward to clean the College Class room without any hesitation. They have drawn beautiful pictures on the wall of class room. After project work they will never throw any dirty things in the College campus.

So we must say the awareness has started. What is the meaning of pratikara ? They asked us the teachers are very happy to see their eagerness. Overall the project had a grand success.
