REPORT ON ONE-DAY WORKSHOP ON STUDY OF BIRDS IN NATURE

Date of programme: 06/11/2019

AIM:

A soft skill learning initiative on basic knowledge of observing birds in nature, methodologies of observation, data collection and computation.

DESCRIPTION:

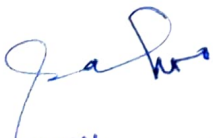

Birds or the feathered bipeds are an integral part of nature. They attract us by their calls and colours. Nowadays bird-watching has become a passion for many. The growing interest has also led to studying their habit, habitat as well as their diversity in Nature. The workshop was held to share the knowledge of bird-watching through the use of binoculars as well as with open eyes. The different methods of counting including Point Transect Method and Line Transect method. Taking photographs at the right light conditions and the right angles, collection of data, etc.

OUTCOME:

The students got a firsthand knowledge on the basics of bird-watching and data collection methods. This would encourage them to become future birders.
