

Title of the Programme- National Youth Day

Theme of the Programme- “Youth Building Peace”

Type of Programme- Extension Activity

Programme organiser- NSS Unit I and Unit II, Dhruba Chand Halder College. There is no collaborative agency.

Programme co-ordinator- Prof Ranjit Mishra

Programme Inauguration- Dr Satyabrata Sahoo, Principal, Dhruba Chand Halder College

Date and Venue of the Programme: 12.1.2018, Dhruba Chand Halder College

Objective of the Programme- National Youth Day is celebrated on **12th January every year in India**. It is also known as Swami Vivekananda Jayanti because it is celebrated on the birth anniversary of Vivekananda as Swami Vivekananda was a firm believer in the power of the youth.

Total Number of Participants- 64

(Teachers: 2 , Students: 62)

Programme Details:

This year, as part of the programme, students were made aware of the ideals and teachings of Swami Vivekananda using. There were songs and processions inside the college campus to celebrate this great day. The special theme chosen for this year’s celebration was

“Youth Building Peace”. Students were made aware of the importance of brotherhood, peace and communal harmony. Dr Subhasis Chakravarty, Associate Professor, Department of Commerce, Dhruva Chand Halder College delivered a talk on the importance of preparing young mind towards peace and harmony of the society. Ideals of Swami Vivekananda and many other Indian thinkers who deliberated on the importance of building young mind and body for a better prosperous, healthy and harmonious society were discussed. Indian society itself is a great example of peaceful and harmonious coexistence of diverse cultural and religious groups. The students were deeply motivated and inspired and some of the participants also came up and expressed their ideas about role of youth in building peace in the society. The programme ended with a few popular Rabindra Sangeet and Najrul Geeti on the theme of communal harmony and peace.

Outcome of the Programme

The Programme was successful in creating awareness of the ideals of Swami Vivekananda among students. It also highlighted the importance of peace in our lives and the role of youth in building a strong and peaceful Nation.

Detailed Report on Importance of Safe Driving in Saving Life

Safe Drive, Safe Live (Campaign on Road Safety) carried out across the state as a movement and just not as a campaign. Road safety is a very important aspect in our lives. Roads take us to schools, colleges, hospitals, markets, offices-practically to almost all places connected with our day to day living. And at the end of the day, roads take us to our homes.

Safe driving is an essential component of road safety. Every day, so many lives are lost due to irresponsible driving and insensible road behaviour.

To inculcate sense of safe driving and responsible road behaviour, the Government of West Bengal has launched this initiative named "SAFE DRIVE, SAVE LIFE".

Programme was carried out with the objective of spreading public awareness about road safety. Programme coordinated by the ANO, Captain TarakDey and SUO of the college NCC unit.

All together 58 NCC cadets consisting of 30 Boys and 28 Girls cadets participated in the programme.

The programme started in our own college campus. Every life is precious. So while driving a motorbike or four wheelers not only the life of the driver, but the lives of the commuters also matters.

Cadets were administered an oath to use roads sensibly, drive responsively and ensure safety of everyone on the roads.

As a good number of students visit college riding in motorbike, the security guards were instructed not to allow any students coming riding on a motorbike without helmet.

To spread public awareness, cadets gathered at the crossing of DakshinBarasat road. The Bikers and the drivers of other motor vehicles were informed by announcing through hand mike and posters about the importance of safe driving in saving life.

South 24 Parganas, Pin- 743372

Capt Tarak Dey
Associate NCC Officer
Dhruba Chand Halder College
Dakshin Barasat, South 24 Pgs.

The points highlighted were:

- Mandatory use of helmet for bikers (both driver and pillion rider).
- Use of seat belts for four wheelers.
- Refrain from Rash driving and traffic violation.

The programme conducted at the crossing of DakshinBarasat road was assisted by the Joynagar Police Station, West Bengal.

The programme was successful in creating awareness among the NCC cadets, students of the college, citizens of nearby locality the bikers and the drivers of four wheelers passed through the location.

Detailed Report on Conserve Water for Present and Future Use

Water is the most valuable and important natural resource on Earth. There is no life without water. Water is not only important for human beings but for the entire ecosystem. Without enough water, the existence of humans, as well as animals, is next to impossible. After fresh air, water is the second most important natural resource for the survival of any living being.

Water is necessary for the survival of each living creature on this planet, be it a small worm, plant or full grown tree. Animals and plants cannot survive without water. About 71% of Earth's surface is covered with water. Unfortunately, only 3% of the water available is freshwater. About, two-third of the freshwater lies in the form of frozen glaciers. The rest of the small portion is available in the form of groundwater and surface water.

We totally depend on water for multiple purposes. Water is used in agriculture for the irrigation of crops. We use water for drinking, cooking, cleaning, bathing and other domestic purposes. In industries, water is used as a coolant, solvent and also used in other manufacturing purposes. Hydroelectricity is generated with the help of water. Water is also used for navigation and transportation of goods. This tells us how water is the most essential component of life and every drop of water is vital for sustenance for present as well as for future. Therefore, water conservation is important to save life on this planet.

Reasons for Shortage of Fresh water are as detailed below:

- Growth of population leads to excessive consumption of water.
- Daily excessive wastage of water.
- Rapid growth of industries and improper disposal of waste material into rivers and other water bodies.
- Pesticides and chemicals fertilisers that are used in agriculture also pollute fresh water.
- Sewage waste that is dumped into the rivers, thereby making the water unsuitable for drinking and washing.
- Global warming.

PRINCIPAL
Dhruba Chand Halder College

South 24 Parganas, Pin- 743372

Capt. Tarak Dey
Associate NCC Officer
Dhruba Chand Halder College
Dakshin Barasat, South 24 Pgs.

We now need to be aware of the depletion of fresh water and take adequate measures to stop this. WHO data shows that many people on this planet don't have access to clean and fresh drinking water. These situations are becoming worse day by day, and we need an immediate plan to control this situation. Various collective measures have to be taken by every individual on this planet and the government of every country to control water scarcity.

Government should impose strict rules for the conservation of water. The Government and the citizens have to take the initiative to create awareness and promote the 'conservation of water'.

Ways in which we can save water and reduce their pollution:

- Be responsible to save water daily. Use only the required amount of water and avoid wastage. Use water wisely.
- Turn off the tap when you brush our teeth or rubbing soap in hands or face. Fix leaky taps.
- Switching to an efficient shower head saves lots of water.
- Save up your dirty cloths and use in a washing machine with full machine load.
- Water plants in the evening or early morning to minimise evaporation.
- Reduce food waste; it takes a lot of water to produce our cereal, fruit and other food.
- Rain water harvesting.
- Get a low flush toilet.
- The industrial waste should be treated properly instead of directly dumping into the river.
- Stop using plastics and dispose of them in a proper way.
- Conservation of groundwater is important.
- Educate our children from an early age about water saving.

PRINCIPAL
Dhruba Chand Halder College
P.O.- D. Barasat, P.S. - Juvangia
South 24 Parganas, Pin- 743322

Capt. Tanuj Dey
Associate NCC Officer
Dhruba Chand Halder College
Dakshin Barasat, South 24 Pgs.

The programme was coordinated by Captain Tarak Dey, ANO of the College NCC unit. 40 Boys cadets and 25 Girls cadets participated in the programme.

Most of our cadets and students are from rural area, where there are abundant water bodies, which are used for bathing, washing and irrigation purposes, so it seems that they are apparently not aware about the gravity of the problem. This programme enlightened them about the importance of conservation of water.

We cannot imagine our lives without water. It is unfortunate that mankind has neglected this precious gift from god. Conservation of water is a necessity to save life. All living organisms on this planet need water to survive. If we do not give importance to conservation of water then our future generations will face water scarcity.

Detailed Report on Beat Plastic Pollution (World Environment Day)

On 5 June every year, the World Health Organization (WHO), United Nations sister agencies and thousands of communities and organizations celebrate World Environment Day. This year, the theme of the Day is "Beat plastic pollution" – a call for action for the world to work together to address one of the great environmental challenges of our time and raise global awareness of the need to reduce the heavy burden of plastic pollution on people's health and the threat it poses to the environment and wildlife.

While the world has derived great benefit from the use of plastics, which have transformed people's everyday lives, the negative ecological effects and adverse impact on health from their misuse and overuse cannot be overlooked. Plastic remains in the environment for a long time, it cannot biodegrade, only break down into smaller and smaller pieces.

When plastics decompose they release chemicals that are hazardous to health, the environment and wildlife. Some of the chemicals released when plastic-containing waste is burned are carcinogenic, such as dioxin – the common name for a group of toxic chemicals. Dioxin is toxic to humans and when inhaled through exposure to fumes can accumulate in the human body and be transmitted from mothers to babies via the placenta. Dioxin attached to dust also falls onto waterways and crops.

Plastic accounts for about 10% of all of the waste we generate which is not a surprise when one considers the following:

- Every year the world uses up to 500 billion plastic bags;
- Each year, at least 8 million tons of plastic end up in the oceans – the equivalent of a full garbage truck every minute;
- In the last decade, we produced more plastic than in the whole of the last century;
- 50% of the plastic we use is single use or disposable;
- We buy 1 million plastic bottles every minute.

Capt. Tarun Dey
Associate MCC Officer
Dhruba Chand Halder College
Dakshin Barasat, South 24 Pgs.

PRINCIPAL
Dhruba Chand Halder College
P.O.- D. Barasat, P.S.- Jangipat
South 24 Parganas, Pin- 743172

Central Pollution Control Board in September 2017 stated that six metro cities alone produce 2,466 tonnes of plastic waste in India per day, which account for nearly 50% of the total plastic waste in India. India's per capita consumption of plastic is 11 kg.

According to industry body FICCI, which estimates that 43% of the plastic used in Indian packaging is single use, which is a matter of concern.

World Environment Day 2018 aims at catalysing governments, industry, communities and individuals to come together to combat plastic pollution and explore sustainable alternatives. Invading our oceans and marine environment, damaging ecological systems and threatening human health, we urgently need to reduce the production and excessive use of plastic, in particular the use of single-use plastic.

Since it began in 1972, as a UN Environment-led global event, World Environment Day has become a platform for public outreach and the single largest celebration of our environment each year.

Captain Tarak Dey, ANO of the College NCC unit coordinated the programme. 44 Boys cadets and 36 Girls cadets participated in this programme.

They were briefed about how plastic wastes are disposed of by the college with the help of local municipality and panchayat . All the cadets were engaged in collection of plastic wastes in the college campus, play ground and the road leading to Dakshin Barasat Railway Station. A huge amount of plastic wastes were collected. The cadets involved in the process themselves were surprised seeing the volume of plastic waste collected by them in such a small initiative. They were trying to visualize the gravity of the problem in a larger aspect.

The programme was coordinated by Captain Tarak Dey, ANO of the College NCC unit. 40 Boys cadets and 25 Girls cadets participated in the programme.

Most of our cadets and students are from rural area, where there are abundant water bodies, which are used for bathing, washing and irrigation purposes, so it seems that they are apparently not aware about the gravity of the problem. This programme enlightened them about the importance of conservation of water.

We cannot imagine our lives without water. It is unfortunate that mankind has neglected this precious gift from god. Conservation of water is a necessity to save life. All living organisms on this planet need water to survive. If we do not give importance to conservation of water then our future generations will face water scarcity.
